

# PROJECT FACT SHEET

**First: Picture Your Project**

A simple drawing of your overall project can be your best tool in avoiding costly or dangerous mistakes.

**Next: Address The Basic Information Needed To Design Your System**

**Question 1: What are the basic site conditions of your project?**

Asphalt _____	Agregate _____
Concrete _____	Gravel _____

This information will determine the utility of ground loops and control wiring, and sealing materials associated with them

**Question 2: What are the relative distances for your project?**

Power Source To Gate _____ ft.	Gate To Control Source _____ ft.
Gate To The Street _____ ft.	Length Of Driveway _____ ft.

This information assists in the determination of peripheral controls and control circuitry.

**Question 3: What type of gate is being operated in your project?**

Swing _____	Overhead _____	Barrier _____	New _____
Cantilever _____	Vertical _____	Ornamental _____	Existing _____
V-Track _____	Pivot _____	Chain-link _____	

**Question 4: What is the gate configuration for your project (refer to graphic at top of page)?**

Opening Size _____ ft.	Opens Left (from inside) _____
Overall Height _____ ft.	Opens Right (from inside) _____
Weight _____ lbs.	Swings In _____
Double Drive (master/slave) _____	Swings Out _____
